Ten words that carry the whole method. Everything else is built from these.

entropy
The randomness from the dice, the raw material the 24 words are built from.

airgap
Tails booted with networking **Disabled**. The computer forgets the session on shutdown.

2-of-3
Any two of three keys can spend. **One alone cannot.**

m/48'/0'/0'/2'
The wallet's path. **Confirmed on screen**, never typed from memory. Not a secret.

PSBT
The unsigned payment file, carried on the USB. The seed never leaves the offline computer.

descriptor / xpub
The wallet map / a watch key. Both **watch**, neither **spends**.

BIP39
The 2,048-word list the 24 words come from.

hash · fingerprint
The file's fingerprint must match the project's published one, **every character**.

signature
The project confirming the file. **"Good signature"**, or the file is deleted.

zero-trust
Nobody's word is taken. **Two tools must agree.**
